

Daniel Cribbin – Associate Director

Current Cabinet Member for Housing
Midlands

Daniel is a lawyer who specialised in healthcare law. Most recently he worked for different NHS Trusts with their in-house legal teams. This places him in a unique position as he actually understands how the NHS operates. This has been very useful in planning applications where unrealistic calls for or comments about medical facilities are made.

Daniel was first elected to Daventry District Council in 2002 and also served on Moulton Parish Council for several years. He has been the portfolio lead member for Environment at Daventry and is currently the portfolio lead member for Housing and Environmental Health. Daniel is also chair of the Standards and Appeals committee and sits on the Planning Committee.

Being the current portfolio lead for Housing and an active member of the Planning Committee, Daniel is in the unique position to provide advice and guidance that is completely up-to-date on the latest rules and regulations in the world of Local Government planning.

This totally up-to-date insight and deep understanding enables the CCP to have a totally unique insight in the planning world not just in the Midlands but across the UK.

Daniel is active throughout the Midlands region and the CCP has a very strong presence in the Midlands where we have found that our competitors are either absent or very London-centric. Therefore we have an office in Northamptonshire that is in the South Midlands for easy reach but also because we need to have real insight in the priorities of the region.
